

## **PROJECT MANAGER**

### **(Renewable Energy & Sustainable Development)**

*Based in Stromness, 37½ hours per week, Salary to be determined based on qualifications, skills and experience inc. pension*

Over the last 18 years Aquatera has established itself as a pioneering environmental and energy consulting organisation with a leading position in marine renewables. It is an award winning company with significant achievements at home and worldwide. Aquatera's core business is:

- Environmental Impact Assessment and Surveying
- Strategic Planning
- Public and Stakeholder Communications
- Integrated support for the full life cycle of renewables

We are seeking to recruit an experienced Project Manager within our Environmental Consultancy who will be a skilled, enthusiastic, competent member of our successful team. We are looking for someone with plenty of drive and initiative and significant project management experience in renewable energy and sustainable development activities across a broad technical range.

Our Project Managers lead a diverse range of projects across the full spectrum of Aquatera's delivery, Given the innovation and new developments in this industry; this includes creative problem solving and strategic planning. Their work is based upon sound principles of environmental stewardship and sustainability with a focus on helping our clients successfully achieve their objectives.

You will have:

- Knowledge/ experience of the renewables sector at a senior level
- Suitable qualifications in a relevant discipline
- Project Management experience
- Responsibility for producing and coordination of large scale reports
- Understanding and experience of the EIA process
- An ability to work under pressure and to tight deadlines
- Effective interpersonal skills to work with clients, stakeholders and regulators and to represent the company
- A role in the promotion and sales of the organisation
- Excellent presentation skills

Please apply by sending your cv and a comprehensive supporting statement outlining your skills, knowledge and experience and how these best fit with Aquatera to:
